|-----------|---------------|
| • NodeJs | • TailwindCSS |
| • React | • JavaScript |
| • MongoDB | • Git/Github |
| • Express | • Restful API |
| • HTML | • Bootstrap |
| • CSS | • SASS |
| • NextJS | |

WORKING EXPERIENCE

SoftWare Developer 2021-Present

Mydesoft Technology

Worked at Mydesoft Tech as a full stack JavaScript developer, where I with other team mates used JavaScript Languages (Vannilla-JS, React, Mongoddb and Express) to build several full stack applications and API's where applicable.

PROJECTS

SELECTED REACT PROJECTS:

Bluecube gallery

Bluecube is a mini-social media platform built with **React**, where users can sign-up and upload their photos with a location caption, and can be reacted with either a love or dislike emoji

Link: <https://react-bluecube-gallery.netlify.app/#>

Dezy It

Dezy It landing page is an easy to use and easy to navigate page that was built with **React**, which includes several sections and well-positioned pictures and animation to engage any user accessing the website

Link: <https://dezyit-ui-design.netlify.app/>

Dicey-Game

Dicey-game it's a logic two users game, that switches between users when a particular rule is broken and points rewarded based on the dice thrown by the current player until a preset winning value is met, and the game ends. It is built with **JSX**, **core CSS** and **React Hooks** to manage various states and rendering

Nexter

Nexter is a reactor landing page, filled with best possible home destination for newly married couple. Built entirely with HTML and SASS, with user friendly and captivating images, cross browser compatibility, and well-structured media queries to for easy accessibility for users of several screens. *Link:*

<https://drsoadjs.github.io/drsoadJSNexterdam/>

Twillo

twillo is an all in booking landing page, using pure HTML and SASS. Its an highly functional, cross browser supported, and responsive to all media screens

[Link: https://drsoadjs.github.io/Twillio/](https://drsoadjs.github.io/Twillio/)

SELECTED NODEJS AND PUG PROJECT

Natours

Natours is a full stack application, built with *NodeJS*, *expressJS* and *mongoDB*; with *PUG* used as its template engine for frontend. Natours encompasses users signing up; logging IN and OUT using JWT through cookie; Booking tours (with *stripe* implemented as the payment platform) and each location of the tours were generated using *mapbox*. The project also includes a well-documented *API* endpoints, which can be used to query various business logic data and can be easily consume for both for mobile and third party client, with the *CORS* well implemented.
